

Zablon Zambagarrah Ombiri

Data Engineer & Analyst | Backend Developer (Django)

zablonombiri001@gmail.com • +254-705-959-986 • github.com/Zambagarrah • linkedin.com/in/zablon-zambagarrah-6a7ab2254 • Mombasa, Kenya

PROFESSIONAL SUMMARY

Results-driven Data Engineer & Analyst with a strong foundation in Python, SQL, and ETL pipelines, particularly skilled in PostgreSQL optimization and Python-based data validation, complemented by backend development expertise in Django. Experienced in designing scalable data workflows, integrating APIs, and improving database performance and reliability. Skilled at bridging analytical insights with engineering solutions to enable data-driven decision-making. Career focus: building robust data systems, advancing AI/ML workflows, and transforming raw data into actionable intelligence.

WORK EXPERIENCE

ZechForge Solutions — Nakuru, Kenya (Hybrid)

Data Engineer / Analyst & Backend Developer | Jan 2024 – Present

- Designed and maintained ETL pipelines processing 10,000+ records daily across structured and unstructured datasets, ensuring smooth ingestion and transformation.
- Built automated data validation scripts in Python, cutting manual QA review time by approximately 40%.
- Optimized PostgreSQL queries and schema design, improving dashboard query response times by up to 30%.
- Developed and maintained backend systems for e-commerce and software infrastructure projects using Django, including RESTful APIs and third-party service integrations.
- Integrated data APIs into production systems, strengthening reliability through Git-based workflows and CI/CD pipelines.
- Delivered insights through exploratory data analysis, enabling business teams to identify growth opportunities.

Swahilipot Hub Foundation — Mombasa, Kenya (On-site)

Software Engineer & Programming Educator | May 2025 – May 2026

- Delivered structured courses in Python, JavaScript, Data Structures, and Algorithms to 30+ learners.
- Mentored learners in debugging, collaborative coding, and clean code practices, guiding projects from beginner calculators to advanced algorithm challenges.
- Helped learners prepare for technical interviews and career pathways in programming.
- Practiced backend development with Django and Python in collaborative projects, strengthening version control skills with Git/GitHub.
- Contributed to discussions on tech for impact and innovation, and explored cybersecurity fundamentals.

PROJECTS

Real-Time Logistics Data Pipeline

Designed a scalable ETL pipeline integrating the Google Maps API with PostgreSQL for cargo tracking. Implemented data cleaning, transformation, and visualization dashboards to monitor fleet performance.

Tech: Python, PostgreSQL, Google Maps API, Pandas, Matplotlib

Healthcare Analytics Platform

Built a Python-based data engineering workflow to process patient records, apply data validation rules, and generate predictive insights using Scikit-learn. Deployed dashboards for hospital administrators to track KPIs in real time.

Tech: Python, Pandas, Scikit-learn, PostgreSQL, Matplotlib

EDUCATION

Technical University of Mombasa

BSc. Mathematics & Computer Science
Sep 2022 – 2026 (Final exams completed; awaiting graduation)

Activities: African Programmers Society, Boxing Society of Kenya

DataCamp

Associate's Degree in Data Analysis
Oct 2025 – Jan 2026

freeCodeCamp

Scientific Computing with Python (Jul 2024)
JavaScript Algorithms & Data Structures (Jul 2024)

SKILLS

Programming & Data Eng.

Python, SQL, ETL pipelines, Pandas, NumPy, Scikit-learn

Databases

PostgreSQL, MySQL, Data Warehousing

Backend Development

Django, REST APIs, Flask

Data Analysis & Viz.

EDA, Matplotlib, Seaborn

Soft Skills

Communication, Teamwork, Documentation, Mentorship

TOOLS

Version Control & Collab.

Git, GitHub, GitLab

Containerization & Deploy

Docker, Kubernetes, CI/CD pipelines

Cloud Platforms

AWS, Azure Data Factory

Reporting & BI

Tableau, Power BI

Currently Learning

Apache Airflow, Apache Spark, dbt

CERTIFICATIONS

- Scientific Computing with Python — freeCodeCamp
- JavaScript Algorithms and Data Structures — freeCodeCamp
- Associate's Degree in Data Analysis — DataCamp
- Exploratory Data Analysis in Python — DataCamp (ID: zambagarrah-eda-python)
