

ZABLON ZAMBAGARRAH OMBIRI

Data Analyst | SQL, Power BI & Python

Mombasa, Kenya | zablombiri001@gmail.com | +254-705-959-986 | linkedin.com/in/zablon-zambagarrah-6a7ab2254 | github.com/Zambagarrah

PROFESSIONAL SUMMARY

A Data Analyst with 2+ years of hands-on experience turning raw, messy data into clear, actionable insight. Strong in SQL and Excel, with practical experience building automated dashboards and reports in Power BI, and a solid Python background for data cleaning, validation and analysis. Comfortable working with PostgreSQL, Google Cloud and BigQuery, and used to translating findings into recommendations that non-technical stakeholders and senior management can act on. Background in backend development (Django) adds a deeper understanding of how data is generated and structured end to end.

CORE SKILLS

- Data Analysis & SQL: SQL, PostgreSQL, MySQL, Excel, Python (Pandas, NumPy), data cleaning and validation
- Dashboards & Reporting: Power BI, Tableau, KPI tracking, automated reporting
- Cloud & Data Engineering: Google Cloud, BigQuery, ETL pipelines, Azure Data Factory, AWS
- Stakeholder Communication: presenting findings to non-technical audiences, cross-team collaboration
- Tools: Git/GitHub, Docker, CI/CD, Jupyter

WORK EXPERIENCE

Data Analyst & Engineer | ByteForge Devs, Nakuru, Kenya (Remote)

Jan 2024 – August 2026

- Extract, clean and analyse large datasets, maintaining ETL pipelines that process 10,000+ records daily across structured and unstructured sources.
- Built automated Python data validation scripts, cutting manual QA review time by roughly 40 percent.
- Optimised PostgreSQL queries and schema design, improving dashboard and report response times by up to 30 percent.
- Ran exploratory data analysis to spot trends and patterns, delivering data-driven recommendations that helped business teams identify growth opportunities.
- Integrated third-party data APIs into production systems and supported backend infrastructure (Django, REST APIs), strengthening reliability through Git-based workflows and CI/CD.

Software Engineer & Programming Educator | Swahilipot Hub Foundation, Mombasa, Kenya (On-site) May 2025 - May 2026

- Taught Python, JavaScript, and Data Structures & Algorithms to 30+ learners, building strong communication and presentation skills.
- Mentored learners in debugging, clean code and collaborative problem-solving, guiding projects from beginner tasks to advanced challenges.
- Practised backend development with Django and Python in team projects, reinforcing version control with Git/GitHub.

RELEVANT PROJECTS

- Real-Time Logistics Data Pipeline: Built a scalable ETL pipeline integrating the Google Maps API with PostgreSQL for cargo tracking, with cleaning, transformation and visualisation dashboards to monitor fleet performance (Python, PostgreSQL, Pandas, Matplotlib).
- Healthcare Analytics Platform: Built a Python data workflow to process patient records, validate data and generate predictive insights with Scikit-learn, deploying dashboards so hospital administrators could track KPIs in real time (Python, Pandas, Scikit-learn, PostgreSQL, Matplotlib).

EDUCATION

Technical University of Mombasa - BSc. Mathematics & Computer Science (Sep 2022 - 2026, final exams completed, awaiting graduation)

DataCamp - Associate's Degree in Data Analysis (Oct 2025 - Jan 2026)

freeCodeCamp - Scientific Computing with Python; JavaScript Algorithms & Data Structures (Jul 2024)

CERTIFICATIONS

- Exploratory Data Analysis in Python - DataCamp (ID: zambagarrah-eda-python)
- Associate's Degree in Data Analysis - DataCamp
- Scientific Computing with Python - freeCodeCamp
- JavaScript Algorithms and Data Structures - freeCodeCamp
